### **Part III DETAILED ACTION**

1. Applicant's arguments filed 6/28/02 with respect to claims 1-18 have been considered but are not deemed persuasive.

#### ***Drawings***

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required should the application be indicated as allowed.

#### ***Claim Rejections - 35 U.S.C. § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371<sup>6</sup> of this title before the invention thereof by the applicant for patent.

4. Claims 1, 3, 7, and 9 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Porter (#5,963,618).

The claims as presented clearly read on Porter which teaches voice processing system 520 figure 5 corresponding to the Messaging systems as claimed which are used by message senders for generating messages, there can be more than one (via col.13,ln.63-col.14,ln.17). The remarks suggest the systems are of the senders, however the claims as presented merely state that the sender uses the system to generate a message. A data center, in as far as such is 'for storing a recipient preference profile' is taught by the database in Porter which is accessed by control system and the voice processing system 'utilizes the information to determine how to process the recorded message' (col.11,ln.54-60).

Art Unit: 2645

***Response to Arguments***

5. Applicant's arguments filed 6/28/02 have been fully considered but they are not persuasive.

The remarks indicate that no prima facie case for the rejection has been established, the examiner can not agree with this statement as the above rejection and reading of the reference as particularly pointed out above clearly teach the limitations of the claims indicated as the limitations are currently presented. It is not clear what the applicant does not see with the respect to the reference cited as corresponding to the limitations presented.

With respect to the remark that the reference does not teach a messaging system used by a message sender to generate a message intended for a recipient using the recipient profile but instead teaches a sender using a system to receive a message, the examiner can not agree with this statement. It is not clear where the applicant interprets a sender using the system for receiving a message. Clearly the reference refers to forwarding calls (which are made to the recipient) to the voice mail system such that the caller (sender) can record a message for the recipient thereof. The reference via col.11,ln.54-60 clearly refers to the profile of the recipient being used to process a message from a caller (sender), not a message sender sending a message to themselves.

***Conclusion***

6. Claims 13-18 are allowable. Claims 2, 4-6, 8, and 10-12 are objected to but would be allowable if rewritten to include the limitations of the base and intervening claims.

Art Unit: 2645

7. Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
